Thank You for Supporting Sweet Treat Social!

Let’s Defeat Sjögren’s Syndrome!

- Sjogren’s Syndrome (SS) is the second most common autoimmune disease, resulting in uncomfortable and often debilitating dry eye and dry mouth symptoms but it is a systemic disease affecting many organs and causing swelling like mumps, joint pain, severe fatigue, lymphomas, and reduced quality of life.

- 9 out of 10 SS patients are women, ages 36-65 but men and children may also suffer.

- Takes average of 5-9 years to be diagnosed; affects an estimated 430,000 Canadians, yet virtually unknown by the public.

- Awareness is the key to early diagnosis and increased quality of life. Research is essential to finding better treatments and a cure for Sjögren’s Syndrome.

- The vital funds you raised will benefit Sjögren’s support and educational programs, and raise awareness and research dollars for this serious autoimmune disease.

Your generous donations will support life changing Sjögren’s Syndrome programs.

430,000 CANADIANS THANK YOU!
